

CARRELLO DC with kit led COOL WHITE

The use of LED lamps is an innovation that offers numerous advantages compared to traditional NEON lamps. Specifically, it allows for adjusting the light intensity and the light spectrum (color of the light) to meet the specific needs of the plant. The COOL WHITE LED kit is the ideal light for stimulating germination or grafting and all those phases that require a “pause,” meaning a suspension of the plant's growth.

cart series SLIM

- 4 shelves
- 2 LED lights per shelf (8 total)
- Shelf spacing: 40 cm
- (LxWxH) 1350x565x1900 mm

SPECTRUM	COOL WHITE 6500 °K
EFFICIENCY	2.0 $\mu\text{mol W}^{-1}$
CONSUMPTION	128 W
PPFD	45-74 $\mu\text{mol s}^{-1} \text{m}^{-2}$
VOLTAGE	220 V (driver) 24 V (led)
AMBIENT TEMPERATURE	max 35 °C – min -10 °C
LED WATERPROOFING	IP65
CULTIVABLE AREA	2.8 m ²
DIMENSIONS L x W x H	1350 x 565 x 1900 mm
LAMP LIFESPAN	L90 > 25.000 hours
WARRANTY	24 MONTHS
